## SUMMARY

Senior full-stack software engineer and partner, with my own products in operation. I translate business rules into architecture, talk directly to clients and boards, and use AI as a verified process — with review and conventions, not as a loose generator. I own the decision, the code and the metric after launch.

## EXPERIENCE

### Software Engineer / Partner

mar 2020 — present

Tracking Trade

- Architected the collection of 40,000+ offers per hour across 100+ marketplaces on 150+ Kubernetes pods, with anti-bot evasion and screenshot proof.
- Modelled routing for 70+ field routes as a VRPTW on Google OR-Tools, with penalties and working-hour capacity — 30% reduction in real travel cost.
- Built an AI support pipeline (context → documentation → resolution or summarised ticket) that cut 73% of tickets.
- Presented the tool directly to the boards of leading electronics and retail brands, unlocking large contracts.

### Founder

2023 — present

MCode Studio Labs

- Apex — a multi-sport app with AI coaching, run end to end: product, back end, Vite front end and AI orchestration. 200 sign-ups before launch, with no paid marketing.
- Marketing automation inside the product flow: blog generation with real sources, Instagram, and the SEO structure of the landing page.
- Pricetrack — price monitoring and scraping at scale (under Tracking Trade).

### Full Stack Developer

jul 2018 — feb 2020

Tracking Trade

- Led the AngularJS → React and Ionic → React Native migrations.
- Built products, microservices and market-facing features from zero to operation.

### Development Intern

apr — jun 2018

Tracking Trade

## SKILLS

| | |
|---|---|
| Languages | TypeScript, JavaScript, Python, Ruby |

| | |
|---|---|
| Front end | React, Next.js, React Native, Expo, Vite |
| Back end | NestJS, tRPC, Trigger.dev, Ruby on Rails, PostgreSQL, Drizzle, Supabase |
| Infrastructure | Kubernetes, Docker, Proxmox, TrueNAS, UniFi, self-hosted |
| Method | Architecture under constraint, optimisation (OR-Tools / VRPTW), AI as a verified process, client communication |

## EDUCATION

Bachelor's in Information Systems — UFPE

Technical degree in Computer Networks — ETEMAC
